KUMILI VINESH

+91 9063945122 vineshkumili45@gmail.com Parvathipuram, Andhra Pradesh LinkedIn GitHub

Professional Summary

B.Tech student specializing in Artificial Intelligence and Data Science with hands-on experience in Machine Learning, Python, and web development. Experienced in developing ML-based applications, AI-powered solutions, and full-stack web platforms using Python, Scikit-learn, TensorFlow, Node.js, MongoDB, and modern deployment tools. Strong foundation in Data Structures, Machine Learning, Deep Learning, and problem-solving, with internship experience in ML model development, deployment, and MLOps.

Education

B.Tech - AI and Data Science, Vignan's Institute of Information Technology 2023 – 2027

CGPA: 8.43

- Relevant Coursework: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOP, Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing

Technical Skills

Programming Languages: Python, SQL (Basic), HTML, CSS, JavaScript
Machine Learning and Data Science: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Random Forest, SMOTE, Model Evaluation, Feature Engineering, Data Visualization (Matplotlib, Seaborn), OpenCV
Web and Deployment: Gradio, Git, GitHub, GitHub Actions, Render
Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform (GCP)
Tools and IDEs: VS Code, Jupyter Notebook, Google Colab, PyCharm

Projects

Transformer Monitoring System | Link May 2025

Python, Pandas, Scikit-learn, SMOTE, Joblib, Gradio
Developed a machine learning based transformer health monitoring system using Random Forest and SMOTE to predict operating conditions from oil and dissolved gas analysis data. Built an interactive Gradio interface for real-time predictions and visualization.

Vignan Virtual Assistance | Link Jul 2026

HTML, CSS, JavaScript, Node.js, MongoDB, NodeMailer
Developed a web-based college assistance platform integrating an AI chatbot, admission eligibility checker, and online complaint management system. Implemented MongoDB for complaint data storage and NodeMailer for automated email notifications to concerned authorities. Deployed the application on Render.

Internship

Machine Learning Intern - Mainflow Services and Technologies Apr 2025 – Jun 2025

Machine Learning, Deep Learning, MLflow, Docker, AWS, Azure, MLOps, CI/CD Pipelines

- Collaborated on client-focused machine learning projects involving model development and deployment.
- Tracked, containerized, and deployed ML models using MLflow and Docker with CI/CD automation.
- Integrated scalable ML solutions using cloud infrastructure.

Certifications

Python Essentials 1 – Cisco Networking Academy Link
Python Essentials 2 – Cisco Networking Academy Link
Data Science BootCamp - From Analysing Data To Creating ML Models – GeeksforGeeks Link
Introduction to Generative AI Studio – Google Cloud Link
